

DAILY RECORD-UNION

PUBLISHED BY THE
SACRAMENTO PUBLISHING COMPANY.
Publication Office, Third St., bet. J and K.

THE DAILY RECORD-UNION

Published every day of the week, Sundays excepted. Double sheet on Saturdays.
For one year, \$5.00
For six months, \$3.00
For three months, \$1.50
Subscribers served by Carriers at FIFTEEN CENTS per copy. In all other cities and towns the paper can be had of the principal Periodicals Dealers, Newsmen and Agents.

THE WEEKLY UNION

Is the cheapest and most desirable Home, News and Literary Journal published on the Pacific Coast.
Terms, One Year, \$2.00
Entered at the Postoffice at Sacramento as second class matter.

Weather Indications for To-day.

California—Rain, southerly winds and heavy stationary temperatures in Northern California, and slightly cooler in the southern portion.
Oregon and Washington—Rain and southerly winds on the coast, and cooler. Storm signals are ordered on the coast of Oregon.
The barometer is highest in Arizona, and lowest off the coast of Oregon.

LOCAL INTELLIGENCE.

Abbott's Creditors.

Some days ago A. Abbott made an assignment for the benefit of his creditors. His debts are as follows:

N. D. Ridout	\$2,518.99
E. D. Ridout	4,577.29
Fred Cox	12,566.63
Thos. Winters	70,248.80
T. D. Littlefield (National Bank & Co.)	5,482.65
M. & C. Smith	1,486.49
William Singer, Jr. principal and interest	10,933.88
Mr. John Perschbacher, about	6,500.00
A. L. Hart, about	1,000.00
Read & Co. Free	351.00
Wm. Singer, Jr. about	200.00
Geo. F. Bates, about	200.00
Zack Bithell	2,007.00
J. O. Coleman	106.68
Charles Patton	224.00
Read & Co. Guarantee	336.36
E. Greer	40.00
Greengard & Co. Business Assn.	40.00
S. L. Wade	40.00
Wm. Curtis	40.00

Following is a list of property not exempted:

An undivided one-half interest in the Magalla mine, \$100,000. This property has been conveyed by deed to Ridout, as a mortgage.

An undivided one-fifth interest in the following real estate: The Winters ranch, which is mortgaged for \$90,000. Said one-fifth interest has been mortgaged to Fred Cox; various leases of said property to sundry tenants; Abbott's interest in the Winters ranch is said to be \$90,000.

An undivided one-half interest in certain real estate in Placer county, purchased by Abbott and J. O. Coleman jointly. Said real estate is cumbered by a mortgage.

An undivided one-half interest in lots in block R and S, Nineteenth and Twentieth streets, owned by Abbott and Alvin jointly. Abbott's interest therein being valued at \$300.

Agreements to buy property by R. W. Parker, Ed. Hopkins, assignee; G. H. Stevens, H. G. Crumpton, J. G. Galt, Mollie Hinch, H. C. Chipman, A. J. Wilson, D. Meagher, Wm. E. Doane, Mrs. F. Luce, Wallace Doane, W. B. Summers, assignee; P. T. Garrett, assignee; A. H. Cunningham, A. C. Boothby, Horace Stevens, Wallace Doane, Emma Skages, Ella J. Merley, R. L. Hattarson. All the contracts were executed during the "boom" excitement in 1887, and within a few days of one another. The latter was joined with Abbott in each of them, but they were made out in the name of N. D. Ridout. Value of Abbott's interest in the compact \$2,000; there being the sum of \$4,190.55. All the contracts are assigned to Ridout, as security for a promissory note of \$5,000.

Shares of the Magalla Mining Company to the number of 74,537, of doubtful, small and probably nominal value, all of which have been transferred to Ridout, as security for money advanced.

A promissory note from C. W. Greenlaw, for \$100, on which \$25 has been paid. The claim due to Abbott and William Gregory from the Joshua Hendy Machine Works for \$40.

Also, sundry personal property used in operating the Magalla mine.

Also, an interest in the personal property on the Winters ranch.

Five contracts for the purchase of lots in block B and F, Twenty-eighth and Twenty-ninth streets, section 10, which were assigned to Fred Cox.

Salary as Railroad Commissioner from February 1st to February 11th, 1889, worth \$130.90, assigned to Bates.

One Winchester rifle, \$15.

Certificates of purchase of certain lands from W. E. Stone, valued at \$3,000, secured to N. D. Ridout.

An interest in the southwest quarter of section 2, township 3 N., range 3 E., Mount Diablo base and meridian; east half southwest quarter section 2, same range and township; east half northeast quarter section 10, same township; north half section 11, same township; southwest quarter section 2, east half southwest quarter and east half northeast quarter, same township and range. All these lands are jointly owned by Abbott, Wm. Singer, Jr., and C. M. Peterson, and are worth \$30,000. Of these lands, however, are held in adverse possession by B. T. Bodhunter and others.

secured to Wm. Singer, Jr.

Ridout, Cox and Winters are secured for the full amount of the money due them. The indebtedness to T. D. Littlefield (or the Bank of D. O. Mills) is not secured, except by judgment from the Superior Court. Neither Starr nor Singer are secured.

Among the other unsecured creditors are Mrs. Perschbacher, A. L. Hart and Read & Co. Free.

THE ELECTION YESTERDAY.

A General Kitting and Scratching in a

The election which took place in this city yesterday was an interesting but peculiar one. The weather was stormy throughout the day, the rain falling in torrents at times, but the ardor evincing on all sides in "knifing" trailing and scratching was not dampened, and was a study to witness.

This evidently was not confined to any particular faction or candidates, but was quite general and worked peculiar results.

The result of the contest for the office of Second Trustee, in which the Republican candidate was defeated by a small majority, was generally recognized as due to a combination of three causes. The first and most conspicuous was the effort of a local bank to continue the city treasuryship in one of its officers; second, the combination of the saloon interests against the election of W. D. Constock, and third, the struggle and trading between factions for the control of the Fire Department.

The contest for the office of Fire Commissioner was, if anything, sharper than that for Second Trustee, and resulted in the reelection of W. D. Constock, by a very large majority. To accomplish this even the head of the Republican ticket was pushed aside.

The total vote yesterday of the city was 4,720, being 272 more than was cast in March, 1888, and 280 less than the total vote at the Presidential election last November.

The result of the election yesterday was that of the following candidates:

William McLaughlin, Second Trustee, Democrat.
E. McKee, Auditor, Republican.
J. J. Buckley, Assessor, Republican.
Geo. A. Putnam, Collector, Republican.
W. D. Constock, Fire Commissioner, Democrat.

THE VOTE BY PRECINCTS.

Precinct	McLaughlin	McKee	Buckley	Putnam	Constock
2nd Precinct	233	141	362	336	436
3rd Precinct	109	134	354	338	384
4th Precinct	15	16	71	36	36
5th Precinct	10	10	127	377	333
6th Precinct	10	10	127	377	333
7th Precinct	10	10	127	377	333
8th Precinct	10	10	127	377	333
9th Precinct	10	10	127	377	333
10th Precinct	10	10	127	377	333
11th Precinct	10	10	127	377	333
12th Precinct	10	10	127	377	333
13th Precinct	10	10	127	377	333
14th Precinct	10	10	127	377	333
15th Precinct	10	10	127	377	333
16th Precinct	10	10	127	377	333
17th Precinct	10	10	127	377	333
18th Precinct	10	10	127	377	333
19th Precinct	10	10	127	377	333
20th Precinct	10	10	127	377	333
Total vote	699	687	738	700	780

The majorities are as follows: McLaughlin, 244; McKee, 29; Buckley, 1,689; Putnam, 1,344; Constock, 334.

LOCAL BRIEVITIES.

The report of the Commissioner in the estate of P. Hoy, deceased, was confirmed yesterday by Judge Van Fleet.

Rev. Mr. Macdonald has services as usual last evening at the Presbyterian Church. The subject of his discourse was "Heaven." Metaphorical views were used to illustrate the discourse.

An alarm of fire from box 35 about 1 o'clock yesterday afternoon was occasioned by a blaze in one of the rooms occupied by Thomas Fox in the Lull House on Seventh and I streets. Loss about \$30.

In the Police Court yesterday the cases of Charles Stoddard, Dan Coleman and George Carter, charged with vagrancy, were continued until this morning. Ed. Williams and James Williams were held to answer to the charge of burglary.

Metropolitan Theater.

Frederick Ward, the tragedian, had a very large audience last night, despite the heavy storm. It was an audience of a high character, and in that respect a special acknowledgment of the superiority of Mr. Ward's dramatic ability. The play was "Virginia," with Ward in the title role.

It was a company of the highest quality. The company throughout is strong and afforded the star support essential to the character of Virginia. The play was well drawn. That role in his hands was well drawn. That was finished work as deserves to be placed abreast of many of the triumphs of the genius of Edwin Booth.

The actor played his part with the skill and knowledge of the superiority of Mr. Ward's dramatic ability. The play was "Virginia," with Ward in the title role.

WELL WATER.

Reply to F. A. Humbert's Report by E.

THE RECORD-UNION: In your issue today I read with much interest and I must say with considerable amusement, the report of Engineer Humbert on the water belt east of the city. I was of the opinion, until I read his verbose and prejudiced report, that he was either a hydraulic or a civil engineer. Since reading his article, and written in the interest of some filtering establishment which desired to saddle a debt upon the city, I have concluded that he must be a "steam" engineer, and that when he tried to answer the communication of Dr. Simons the valve was wide open. He certainly has not done justice to the eastern suburbs, and has filed with the city Trustee a prejudiced report founded on fact or no investigation.

I have on my place twenty-two wells in different localities, only one of which was found necessary in boring to pipe or tube. Attached to the pump in the wells are windmills. During the season when irrigation is needed there is a constant flow of water from the wells, and this clear water had been the wonder and delight of all Sacramento people who visit the grounds. It has been several occasions tested by the medical faculty from different wells and pronounced pure. The water Mr. Humbert used in his test was taken from one well only. That well is situated near the house with a small hand pump on the pipe. I informed him that the water in that well was not a fair test. It was little used, had not been pumped out for months and sewage water was standing around it. That the result should be as he stated I expected.

This well, with its surroundings, was evidently the well of all others. It was looking for. It seems to have suited his purpose, for he took no water from any other well. This well of all others, at this season of the year, would become contaminated, and most any "steam" engineer would be aware of that fact.

Mr. Humbert speaks of the contamination as due to its proximity to Burns slough. The water from the flowing wells in Burns slough has been repeatedly analyzed and pronounced absolutely pure and I will say here that the flow of water in Burns slough increased naturally at the commencement of the fall month, when the slough are fed from mountain sources. Mr. Humbert puts considerable stress upon the fact that the water in Burns slough is not as pure as the water in the American river. It is not all rivers, streams and wells, the world over, higher in winter than summer.

A stranger reading Humbert's report would be led to believe people outside of Sacramento, City, and using water from wells, would be subject to malarial diseases and typhoid fever. My experience of twenty-eight years in this locality with a large family and a general knowledge and observation of this section of country, justifies me in the assertion that there is no more healthy location in the whole Sacramento valley. I have never had a case of typhoid fever in my family, and never knew of a death from that cause in this section.

In conclusion I wish to state that I am not paid for writing up my water or the water of the State, but being particularly interested in the Southern portion, from the large immigration of these sufferers to that general section, it is deemed of importance to give the conclusions of Dr. G. Cornet upon the infectiousness of the disease. His researches show conclusively that the virus of consumption is not ubiquitous, but arises and remains concentrated about individuals. In these cases the patient only becomes dangerous when the most elementary rules of hygiene are neglected.

Of the discharge from a consumptive patient it is only the sputum which is dangerous. The expectation, as long as it is moist, is devoid of danger. If the sputum is dried, it is no longer a source of risk. The cup should be kept covered, except when in use, not to prevent evaporation, but to keep out flies, which have been known to carry the virus about on their feet. The great danger arises when the patient expectorates on the floor or in a receptacle. In these cases the sputum is pulverized and carried about by the winds, and if inhaled by a person susceptible to the disease, it will produce the effects of inoculation. Dr. Cornet is also of the opinion that the patient is by indiscriminate expectoration even more dangerous to himself than to his surroundings; that he can poison himself, and that the inhalation of a few bacilli more, and consequent starting of a fresh foot of disease in his lungs may determine the speedy end of his life.

From these remarks it can be seen very important it is that the expectorator should be disinfected, especially in hotels, pleasure resorts and sanitariums, where the virus is so health's sake. Until this is methodically and effectually done, we can hope for no relief from the disease, which is preventable, and which Dr. Cornet says kills one-seventh of the entire population.

A friend in need is a friend indeed is the motto of the author of "Hobbs Little Vegetable Pills." They always cure.

DIED.
Drowned, on the Yolo side, opposite this city, March 11—Thomas L., son of Thomas and Mary, aged 10 years, 8 months and 11 days. (Papers enclosed for burial.) The body will be taken to the residence of his parents, Washington, this afternoon, at 2 o'clock; thence to the new Catholic Church, where service will be held.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Man, she clung to Castoria,
When she had Children, she gave them Castoria.

He Had Better Look Out.
The following communication is self-explanatory and evidently to the point:
Rev. Mr. Macdonald: Being an old subscriber of your valuable and estimable paper I want the following warning inserted in your first issue without fail. If that young San Francisco clown, a salesman, who wears a high silk hat and walks like he owned the whole town, if he comes near my place, I will shoot him a shotgun the next time he calls around. I have warned him by letter before, but he won't pay attention to it. He will be my last warning, and if he don't take him from this it will be his own sorrow. I should think when a man is 27 or 28 years old he ought to be able to keep his daughters to associate with low, depraved persons, and I would like to see his children and not made immoral and finally prostitutes. This will be my last warning. Beware!
AN ANGRY FATHER.

A New Range.
Sunday the new 300-yard range of the Sacramento Rifle Club opened on Twelfth street. Their motto is, "To increase the skill in marksmanship and strengthen the bonds of friendship." A large number of gentlemen were present. Major Wells first shot and then presented to the old Sacramento Rifle Club by General John A. Sutter in 1853. The rain spoiled the shooting, but not the fun, as a fine banquet was enjoyed by the members of the club and a large number of friends.

The members of the club are A. Ackerman, Jacob Grubler, Frank Hubstater, N. Friedman, F. Yoer, G. P. Yoer, F. C. Yoer, A. H. Griesel, G. Bernhard, August Hess, F. Grubler, J. Foster, C. Miller, A. Meister, Joe Klein, M. Holland, J. Grubler, Treasurer: A. H. Griesel, Secretary, and Joe Klein, Targetmaster. The club will have weekly shoots.

The Horse Trainer.
McKown, who some weeks ago gave such really fine exhibitions here of the power of kindness and firmness in conquering animals, and in educating them out of fear and confidence in their masters, will have another entertainment at Armory Hall to-night. Of several horses to be handled there is one from Woodstock that is especially bad, a kicker, puller on the halter and is generally unmanageable—as is supposed. McKown's entertainments were very successful. He was here in January very destructive, and proved of value to all who attended them. It would be better for horse and their masters if more of the latter followed McKown's advice.

A Challenge.
Company G, of the First Artillery Regiment, has issued a challenge to any company in the National Guard of California, for a match at the 300-yard target with Springfield rifles, for \$100 and upwards. The conditions are that they shoot from 25 men to the full strength of the company.

Heavy Rain Storm.
It commenced raining here yesterday shortly after 12 o'clock, and poured down during the afternoon and evening. It was still raining heavily at midnight.

THE STATE'S HEALTH.

Monthly Circular of the State Board for

February—Small-pox Abating.
Gerard G. Tyrrell, M. D., permanent Secretary of the California State Board of Health, has issued his monthly circular for February, in which he says:
Mortality reports have been received from sixty-seven localities, with an estimated population of 685,000. The total number of deaths reported was 859, which gives a percentage of 1.25 per thousand in the month, or an annual death rate of 15.48, which is an unusually small percentage for the season of the year, and indicates the absence of any epidemic disease upon the coast.

Deaths resulted as follows: Consumption, 163; acute pneumonia, 102; acute bronchitis, 22; congested lungs, 7; diarrhoea and dysentery, 5; cholera infantum, 4; other diseases of the bowels, 23; diphtheria, 22; scarlet fever, 1; measles, 1; small-pox, 1; typhoid fever, 1; typho malarial fever, 1; typho fever, 1; remittent fever, 1; cerebro spinal fever, 14; cancer, 26; erysipelas, 1; diphtheria, 1; alcoholism, 1; other causes, 350.

Reports received from seventy-five localities in different parts of the State indicate an unusual absence of sickness, with the exception of pulmonary diseases, which are prevalent in many places, especially influenza, which seems to be almost universal. As it has no very dangerous tendency, and depends more upon meteorological conditions than infection for its diffusion, it can hardly be included among the zymotic diseases.

DIPHTHERIA.
Continues to be reported in Los Angeles, Ventura, Anaheim, Downey, San Bernardino, Salinas, Fresno, Napa, St. Helena, Santa Cruz, Truckee, Millville, Elita Mills, Anderson, Oakland and San Francisco. In the latter city thirty-four cases were reported during the month, which is a decrease in the importance of the disease. In these cases is beginning to attract the notice of the public, and when we consider that the disease is fatal to two out of every three persons who contract it, it is not too much to say that it is a very dangerous disease. It is not too much to say that it is a very dangerous disease. It is not too much to say that it is a very dangerous disease.

SMALL-POX.
Is abating in a very gratifying manner. In San Francisco there was but one case during the month of February. Dr. Wrenn, writing from Placerville, reports that five cases occurred during the month. These all seemed to have originated from infection with what was supposed to be pneumonia; it was the first one taken with unobscured variola was her son, and soon after the priest who attended her was stricken with the disease. Although many persons were exposed to the disease it has not spread, vaccination being at once resorted to. One case was reported in near Stockton. There was also a case in the person of a colored waiter, who had come ten days before from Carson. He was waiting at dinner when the pustules were noticed upon him. He was at once isolated and quarantined. In Merced two cases were reported as convalescing. No other reports of small-pox have been received.

CONSUMPTION.
In view of the wide distribution of this disease, unknown to any portion of the State, but being particularly noticed in the Southern portion, from the large immigration of these sufferers to that general section, it is deemed of importance to give the conclusions of Dr. G. Cornet upon the infectiousness of the disease. His researches show conclusively that the virus of consumption is not ubiquitous, but arises and remains concentrated about individuals. In these cases the patient only becomes dangerous when the most elementary rules of hygiene are neglected.

Of the discharge from a consumptive patient it is only the sputum which is dangerous. The expectation, as long as it is moist, is devoid of danger. If the sputum is dried, it is no longer a source of risk.
